

TO: Whom it may Concern

FROM: Kyle Flanagan, City of Southlake Water Supervisor

DATE: April 4th 2021

SUBJECT: Wildstone Construction Letter of Recommendation

Prospective Customer,

The purpose of this letter is to inform that Wildstone Construction of Haslet Texas has performed several large diameter/high-profile water main projects, repairs and relocates owned and operated by the City of Southlake.

John Kolb, President of Wildstone Construction, and his Team for years have serviced Southlake with installation, repairs and relocates of large diameter concrete steel cylinder lines, ductile iron, PVC, and HDPE. All work were completed as described and to the City's satisfaction.

Several jobs include replacing a critical 30" Concrete steel cylinder line down N. Pearson and along FM 1709 that services Southlake and Keller.

Repair of a 30" hit by a contractor near FM 1709 & Keller Smithfield Road.

Relocation of 20" concrete steel cylinder line that blew out under a TXDOT traffic signal and down Shady Oaks Blvd.

Installation and Repair of 12" HDPE water line on N. Peytonville in Southlake.

Repair of a 16" Ductile Iron Suction Can at Southlake Booster Station at N. Pearson & FM 1709.

Thank you,

A handwritten signature in blue ink, appearing to read 'K. Flanagan', with a long, sweeping underline.
